DESCRIPTION

• Criteria: 1D and 2D codes e.g. Code 128, DataMatrix and plain text such as lot, expiry date, GTIN and serial numbers

• Implemented codes: GS1, IFA, CIP 13, ITS, Bollini IPZS, Royal Vignette Belge and China E-Coding

• Box sizes: A = 15 - 220 mm, B = 20 - 120 mm, H = 60 - 220 mm

• Fixed or adjustable height of folding box feed: 800 - 1,050 mm

• The machine control of all components is performed by a PLC

• Compatible to printers by Wolke, REA, Bluhm and Domino. Other printers, e.g. DoD can be implemented upon request.

APPLICABLE OBJECTS

Folding box

Pharma-code

DataMatrix

GTIN: 12345678901
Lot: 1234ABCD
Exp: 12/2035

Plain text

ON SITE

Tool-free adjustment to individual folding box size on site. The sensors ascertain precise folding box print, print verification as well as rejection verification. Rejection can occur pneumatically or via a mechanical turnout.

High-precision placement of print thanks to precise folding box guidance

Handling of data and serialisation by IMPERA

SCANWARE HIGHLIGHTS

Highest security & failure-safety

Partnership & Trust

In-house development

Customisable to optimise productivity

User-friendly & intuitive
