DESCRIPTION

- Criteria: Presence and position of labels
- Optional: Combination with CAPA MV for mark & verifying features
- In combination with CAPA MV, the station guarantees that the print on the folding box will not be smudged by the label. Even at the highest machine speed, the required time for the ink to dry (0.7 s*) is ensured.
- Maximum standard sizes of folding boxes: A = 30 - 220 mm, B = 15 - 120 mm, H = 70 - 220 mm
- Offers ejection verification
- Labeling is applicable for all common closing patterns and can be adjusted tool-free

APPLICABLE OBJECTS

Tamper-evident folding box

ON SITE

The station is designed to be operated from the front without any need to walk around it. The labelling position on the box is variable and can be adjusted electronically.

High precision of label placement thanks to precise folding box guidance

Tool-free adjustment to folding box size
